SAR Technology Products and Services

SAR Technology's is pleased to offer its [Aircraft Crash Location Service](#) to help predict the final surface (ground/water) location of the missing aircraft based on its aeronautical parameters, the current weather conditions at the time of the incident and the terrain topography in the predicted location. By utilizing advanced prediction algorithms and GIS tools we can produce probable surface location 'crash maps' of the aircraft's location for the current scenario under consideration.

 SAR Technology's [Aircraft Debris Location Service](#) predicts the final surface (ground/water) location of an aircraft that has broken up in flight, for example from an onboard explosion or an explosive projectile aimed at the aircraft. The Aircraft Debris Location service utilizes advanced algorithms to predict the final surface location and debris field of the various components of the aircraft as they fall to earth from the disintegrating aircraft.

SAR Technology's [Optimized Planning Service](#) is designed to significantly increase the speed and effectiveness of a major SAR response by ensuring that all the search resources, for all the designated search areas, are deployed in the most precise and effective manner. Unique algorithms have been developed that determine the fastest and most efficient SAR deployments, for all the search areas, to minimize the time and search effort required to quickly finding survivors. The Optimized Planning Service delivers the fastest and most effective search response, with the highest probability of finding survivors –alive!

SAR Technology Inc. is pleased to offer its powerful '[Incident Commander Pro](#)' software to manage all types of emergency-response incidents, including major air, marine and ground response missions. 'Incident Commander Pro' includes all the tools required to effectively manage, deploy, track and monitor resources as they respond to incidents. 'Incident Commander Pro' also includes an extensive set of specialized tools that ensure the fastest and most efficient response is always deployed to the mission.

SAR Technology's unique 'Track Commander' software for Android phones is a rugged and capable tracking application specifically designed for emergency responders. Track Commander' has many professional grade features and full compatibility for real-time tracking on 'Incident Commander Pro's map display. With built-in predefined messages, custom messages, SOS and Help alerts 'Track Commander' is purpose-built for reliable and economical tracking and messaging with 'Incident Commander Pro'.

Boots On the Ground - Global Response Team

When life is at risk, you need responders – Now!
When disaster strikes, you need responders – Now!

Boots on the Ground delivers the skilled responders you need - World-Wide. Fast!

Trained, experienced and motivated, our team delivers a fast and powerful on-scene response to meet your mission's goals.

http://sarotechnology.ca/sarotechnology/ST_BootsOnTheGround.htm

SAR Technology Training offers all levels of training on search, rescue, safety, security and emergency response. Courses are tailored to each group and provide a solid foundation for its graduates to capably and effectively respond to any type of mission they may encounter. Both basic and instructor-level courses are offered to meet local needs.

http://sarotechnology.ca/sarotechnology/ST_Training.htm

SAR Technology Consultation provides extensive knowledge, years of practical experience and advanced scientific skills to provide the expert advice, information and guidance you need to meet your organizations objectives. From immediate mission response, to training programs, mission reviews and implementation of local or national emergency response systems SAR Technology Consultation rapidly delivers the specialized expert advice, information, products and services you need.

http://sarotechnology.ca/sarotechnology/ST_Consultation.htm

If you would like further information on how to enhance your mission response with SAR Technology's products and services we would be pleased to be of assistance.
